Pathway to Carbon Free

Presented by Nicholas Phillips

The presentation will cover PNM's Integrated Resource Planning process and road map to a carbon free system by 2040. Included in this presentation will be a discussion of the analytical approach to the IRP (reliability analysis, economic analysis, load forecasting, etc.), the types of technologies being considered, the regulatory requirements we must meet, and challenges we foresee in completing the transition in such an accelerated time frame.

LEARN

Presented by experts at the forefront of their field, sessions focus on skills and offers practical suggestions for applying them in real-world situations.

CERTIFICATION

Demonstrate your commitment to upholding quality standards and continued learning to earn Quality Certificate from the UNM Anderson School of Management

NETWORK

Meet prospective mentors, partners, and clients, and gain access to the resources that will foster your career development
