7:15-9 am

Human Factors in the Modern Era and How it is Part of Our Everyday Lives

Presented by Cherly Bolstad PhD

Human Factors is all about fitting people to the system rather than fitting the system to each person. It is important that we design the roles and the systems for the humans, based on their needs and abilities. Anytime the human is not taken into consideration, the user may be unhappy, the system may not be used correctly or have ideal performance and the opportunity for errors increase dramatically.

Via Zoom

Zoom link will be sent upon registering

Members: Free

Non-Members: \$20/Seminar
