Leveraging AI for Operational Excellence

Presented by John Hernandez

Discover how artificial intelligence (AI) can foster operational excellence by empowering workforces, streamlining communications, and enhancing knowledge creation and dissemination for effective and efficient decision-making. This talk focuses on leveraging AI to optimize operations, ensuring organizations stay ahead of the curve through innovation.

LEARN

Presented by experts at the forefront of their field, sessions focus on skills and offers practical suggestions for applying them in real-world situations.

CERTIFICATION

Demonstrate your commitment to upholding quality standards and continued learning to earn Quality Certificate from the UNM Anderson School of Management

NETWORK

Meet prospective mentors, partners, and clients, and gain access to the resources that will foster your career development
