### Solving Problems: The #1 Skill for Middle Management

Presented by Rob De La Espriella

#### WHAT YOU WILL LEARN:

>> The high cost of recurring problems in modern operating and manufacturing environments, and why we can't seem to solve them.

>> Introduction to a set of skills needed to solve recurring problems in modern high-tech and regulated environments.

>> Introduction to a virtual, integrated, problem-solving framework based on systems theory and enhanced by artificial intelligence.

#### LEARN

Presented by experts at the forefront of their field, sessions focus on skills and offers practical suggestions for applying them in real-world situations.

#### CERTIFICATION

Demonstrate your commitment to upholding quality standards and continued learning to earn Quality Certificate from the UNM Anderson School of Management

#### NETWORK

Meet prospective mentors, partners, and clients, and gain access to the resources that will foster your career development
